Variance Application # 17-AB-02

- The applicant requests a variance to construct a new 46' x 48' barn to extend an existing abutting 46'x48' barn, the southern wall of which must protrude 4' into the standard 35' front setback. Therefore the owner is requesting consideration of a 4' variance of the standard (per §11-8.9.E in the Zoning Ordinance) 35' front setback per §3-1.8D.1 in the Board of Appeals Ordinance due to the physical constraints of the site and necessary location for continued farm function.

3. Adjourn
